Teeth in Ancient Egyptian Religious Texts

Rania Abdel Aziz Mahmoud*
Lecturer, Fayoum University, Faculty of Archeology

Abstract:
The mouth is one of the most important body members, as it receives food, drinks, speech and sense. The opening of the mouth rite was one of the most important and most significant rites known to the Ancient Egyptians.

Teeth were among the most important parts mouth having great significance to the Ancient Egyptian. Many words have expressed these ideas and have taken the elephant tusk as a determinative.

The Ancient Egyptian used the animal tusks such as those of the elephant, hippopotamus in different industries such as amulets, make up and primitive drugs.

The religious symbolism of teeth varied from pyramid texts to coffin texts and books of the dead. The mouth of the deceased was provided with teeth of Horus with onion offerings. His sharp teeth were described as the teeth of the immortal god “Soped”. In addition, the teeth of the deceased king were the souls of “ba” and they were obtained from the viper hill “dw.ft”.

In CT, the deceased was given strong sharp teeth made of flint stone made of the material of stars. His sharp teeth enabled him to be embodied and appearance as the god “Sobek”.

In the Book of the Dead, the deceased declared his ownership of sharp teethlike the god "srkt" and canines like the holy goddess Isis. The glitter in his teeth and its beauty is due to his being a member of Fayoum city.

Introduction

The human body had great holiness for the Ancient Egyptian reflected in many rites special for reviving him through rites of protecting all his body members.\(^{(1)}\)

The mouth is among the most important human body members where its function was represented in receiving food, speech and expression of sense\(^{(2)}\).

The opening of the mouth rite known in the ancient Egyptian language as \(\text{wpt}\)\(^{(3)}\) is considered one of the most important and famous rites in the Ancient Egyptian religion\(^{(4)}\). The opening of the mouth rite took place on a statue representing the deceased or the mummy of the deceased himself\(^{(5)}\) by reviving the senses of the deceased starting from the revival of the mouth through this rite.\(^{(6)}\) It was originally performed on statues of gods, then became performed on all the deceased, whether kings or individuals, in addition to being performed on miniatures used for the purpose of magic\(^{(7)}\), such as: the scarab of the heart and other amulets\(^{(8)}\). It was also performed on some sacred animals, such as the calf Abis\(^{(9)}\). Moreover, it was performed for temples, where they replace the gods in their images and form engraved on walls. Thus, the offerings presented to them are offered.\(^{(10)}\)

Some words signifying some mouth parts were used in ancient Egyptian texts such as:

Since the era of the Old Kingdom, the word \(l\)\(^{(11)}\) was used to express the mouth or wisdom, speech and language.\(^{(12)}\) And since the era of the Middle Kingdom it was used in the form of \(\text{spty}\), and New Kingdom, it appeared in the forms of \(\text{SSw}\), \(\text{SSW}\), \(\text{S}\)\(^{(13)}\). It was used to express the bill/ beak of birds and animal mouths.

In addition, some words were used to express some mouth parts in Egyptian texts.0

Since the era of pyramid texts, the word \(\text{spty}\) was used\(^{(14)}\) in the form of \(\text{s}\)\(^{(15)}\) and in the era of the Middle Kingdom in the form of \(\text{s}\), as well as in the era of the New Kingdom in the form of \(\text{s}\)\(^{(16)}\) and with the determinatives \(\text{t}, \text{t}, \text{t}\) to express lips. Since the Pyramid texts, the word \(\text{SSw}\)\(^{(15)}\) was used in the forms of \(\text{s}\)\(^{(15)}\), \(\text{s}\)\(^{(15)}\), \(\text{s}\)\(^{(15)}\) and in the era of the New Kingdom in the forms of \(\text{s}\)\(^{(15)}\), \(\text{s}\)\(^{(15)}\) and \(\text{s}\)\(^{(15)}\) in the forms of to express the tongue since the Pyramid texts in the forms of
as well as in the era of the New Kingdom in the form of \( \text{ibHw} \), and in the era of the New Kingdom in the form of \( \text{nhd-t} \). The word \( \text{ibHw} \) was used to mean teeth and the word \( \text{nhd-t} \) since the era of the Middle Kingdom in the forms of \( \text{ibHw} \) to express the molar, but in most cases it also expresses teeth. The two words used the determinative \( \text{elephant tusk} \). Similarly, the terms \( \text{Ts} , \text{Tst} \) the canines of the hippopotamus and pieces of ivory were used since the era of Naqqada I with dots and semi geometric engraved borders and other zigzag line. They made a deep border for each of them surrounding its upper part nearly dividing it to two parts: a small upper part representing the head, and a big lower part representing the body. In a museum in the university college in London, there is a big set of these tusks that the great scientists predict are amulets used whether for those living or dead. In this explanation, the scientists depend on a hole being at the top of some of these tusks. In contrast, some others suggested that these tusks were used in preserving the makeup powder and primitive pharmaceutics that can be extracted from nature and from these canines and used. Randalle suggested that they represented part of magicians’ tools, or they might have been used by dancers in performing their dances then.

Most of these tusks were distributed on some European museums, such as the Ashmolean Museum in Oxford and Berlin museum. The opinions of scientists differed about the dating of these tusks. Most opinions are unanimous about them being from the era of Naqqada I.

**Aim of the research**

Signifying the role of teeth in the hereafter and their relationships to the gods, as there is no separate study for their roles. Thus, the scholar consulted several references which are:

- Sethe.k., Die Altägyptischen Pyramidentexte, 4 Bde, Leipzig 1908-1922.
Teeth in Ancient Egyptian Religious Texts

1. Teeth in pyramid texts

The religious symbolism of teeth varied in pyramid texts where the mouth of the deceased is supplied with the white teeth of Horus with five pots of onion. The teeth of the deceased were depicted as the teeth of immortal “Soped” with sharp teeth. The teeth broke the stone due to its extreme strength. In addition, the king’s teeth were in alba souls. Moreover, the deceased king’s teeth Osiris come from the viper mountain "dpw.ft".

Starting with spell “45” of the pyramid texts, the deceased king is supplied the white teeth of Horus with 5 pots of onion.

\[ Wsir \ m \ n.k \ ibhw \ Hr \ hdw \ htmw \ ri.k \ hdw \ iph \ 5 \]

“It is he Osiris the King take the white teeth of Horus for you to supply your mouth with, five pots of onion.”

Roth thinks that the offering presented with the teeth is the garlic not onion, and that the clove of garlic when peeled resembles the teeth more than green onion. He said that there is resemblance between dentition in children and presenting garlic, as the deceased when revived again becomes like the newborn, so he must pass by the dentition stage until he eats solid food. So, the aim of presenting garlic in the opening of the mouth rite is achieved. In contrast, Hassan thinks that this offering is "hdw “onion” .

Barta sees that it is onion, and thinks it is an appetizer.

Ghalioungui believed that presenting onion was linked to resurrection of the deceased, as it makes the deceased breathe once more.

The concept itself is repeated from presenting onion with the teeth of the deceased Osiris in spell 125 where the following appeared:

\[ dd \ mdw \ Wsir \ m \ n.k \ ibhw .f \ hdw \ wtdw \ dd \ mdw \ sp4 \ N \ pn \ f3t \ hnk \ sp4 \ hdw \ iph \ 4 \]

“Recitation: O Osiris I bring to your healthy white teeth a four-time recitation; O King a presentation; four times pots of onions”.

In spell 215, his head resembles the head of Hr –Dw3t, his face resembles the face of mhtny irty, his ears are the ears of the son of Atom “the twins”, his eyes are the eyes of sons of Atom, and his nose is the nose of the jackal. As for his teeth, they are the teeth of “Soped” the imperishable.

The spell refers in passage 148 to the following:
Your head is ḫr -dwšt, O imperishable, your face is (the face) of mḥnty – īrty O imperishable, your ears are (the ears) of the son of “Atum” the twins O imperishable; your eyes are the eyes of the son of “Atum” the twins O imperishable stars; your nose is the nose of the jackal O imperishable; your teeth are the teeth of “Soped” O imperishable.

The same meaning is repeated in spell 222 in passages 201-202 as follows:

Iwm.fr .k it .(f) iwm.kfr .k spdwiwn.fr .k it (f) iwm.fr .k spd- ibhw

“Your walk is the follower (back) of Osiris, your face in front of you, your prayers in front of you, the kindness (sweetness) for your nose because of the perfume of “iḥt-wtt” and for your feet when you step out of the place of your celebrations for your teeth and nails when you break the stones.”
Teeth in Ancient Egyptian Religious Texts  

Aziz Mahmoud Rania Abdel

The scholar believes the power possessed by the deceased to break the stones emerged from the perfume “iḥt-wtīt”; this goddess that possessed a scent that helps the refreshment of the body, and with her ability transfers the deceased from one place to another. Thus, the deceased possessed the same abilities of this goddess viper.\(^{52}\)

In addition, he was embodied in the Osirian image which links the teeth to the events of the Osirian legend. It was earlier pointed out that the deceased possessed Horus’s strong teeth.

In addition, the events of spell 539 of the pyramid texts to a new meaning as the king’s teeth represent “ba” souls\(^{53}\) so that he can ascend to heaven, where the following is mentioned\(^{54}\):

\[
\text{Pry.f rf šwy.f rf ir pt ns n (P) pn m mṣṭt ir wi ḫm ṭ pry.f rf šwy.f rf ir pt ibḥw (P) pn m bḥw} \tag{55}
\]

“He is emerging and ascending to heaven and the tongue of this king (P) is the (leader) of the boat ṭ mṣṭt that he emerges and ascends to heaven, the teeth of this king are souls of bḥw”\(^{56}\).

In merging with the Osirian legend events, the image of the deceased Osiris follows King Osiris and becomes blessed with bread\(^{57}\) and beer\(^{58}\), as his white teeth are from the viper mountain” ḫw.ffffff”. Passages 1357-1359 refer to the following\(^{59}\):

\[
\text{ṭs tw ḫḥ pw } pn hms wšb(w).k hms ḫḥ wnm.f t hnk ḫнс.k n nwr ndqš ṭmт.k tw sti is wsir rdw.к skr.sn n.k ḫ(w).sn in(w).sn n.к bbw.k n ibḥw.k ḫdw ḫn.wт.k (m) ḫw.фt ḫ.к k3 –wrir ṣḥwt - wḏt} \tag{61}
\]

“Raise yourself, O soul of (Akh) this king and sit and eat your...
meal, may be your (ka) will sit and eat bread and beer non-stop forever. You
go like the follower of Osiris; your feet step outwards and their arms bring
for you your feasts because your white teeth and your nails are of the viper
mountain $dw.f.t$. May you cross, O Great Bull, to the green fields.\(^{(62)}\)

Spell 659 of the PT directs the speech to the deceased king, asks him
to receive his white teeth and revolve around them with an arrow between
them. It refers to the following\(^{(63)}\):

"htwy-irty came if you do not know him, and you will lie down
(sleep) in his arms (in his bosom) until he stops his efflux as your calf for he
is your herdsman; receive your white teeth in this jar; revolve around them
with an arrow in their names is that arrow; and that your front (limbs) are
in $t\text{A-wr}$ “Abydos”\(^{(66)}\) and your hind limbs are in $t\text{A-sti}$ (Nubia)\(^{(67)}\).”

Mercer comments about revolving around the jar containing the teeth
with an arrow that he is describing a game called “the viper” because the
word "mhn" is one of the names of the viper mountain\(^{(68)}\).

2. Teeth in coffin texts

Teeth had important significance and symbolism in coffin texts, where
the deceased cleanses himself and cleans is teeth to cross heaven and pass it.
In addition, the deceased was able to obtain strong sharp teeth made of flint
and canines from the viper mountain “$dw.f.t$”. In coffin texts, there was
reference to the teeth of the deceased being made of star metal.
Here, the study starts with spell 173 which refers to the following\(^{(69)}\):

\[
\begin{align*}
I\text{i m m-htwy irty i i r hmw.k sw sdr.k r.k m-hnw 5wy.f ir drw rdw.k bhs.k is mniw.k i s pi ssp n.k ibhw.k ipw hdw m hnw pw phrw h3.sn m ssr m rn.sn pw n(y) ssr hpš.k m t\text{-wr w\text{r}t.f m t\text{-st}}.\text{y}^{(64)}.
\end{align*}
\]

"htwy-irty came if you do not know him, and you will lie down
(sleep) in his arms (in his bosom) until he stops his efflux as your calf for he
is your herdsman; receive your white teeth in this jar; revolve around them
with an arrow in their names is that arrow; and that your front (limbs) are
in $t\text{A-wr}$ “Abydos”\(^{(66)}\) and your hind limbs are in $t\text{A-sti}$ (Nubia)\(^{(67)}\).”

Mercer comments about revolving around the jar containing the teeth
with an arrow that he is describing a game called “the viper” because the
word "mhn" is one of the names of the viper mountain\(^{(68)}\).

2. Teeth in coffin texts

Teeth had important significance and symbolism in coffin texts, where
the deceased cleanses himself and cleans is teeth to cross heaven and pass it.
In addition, the deceased was able to obtain strong sharp teeth made of flint
and canines from the viper mountain “$dw.f.t$”. In coffin texts, there was
reference to the teeth of the deceased being made of star metal.
Here, the study starts with spell 173 which refers to the following\(^{(69)}\):

\[
\begin{align*}
T\text{wi.i sw}^{2}b.i r3.i snśmśm(w) ibhw.i mk wi hs twr wi wsšt mī bwt d3w.wt pt mwt sp2^{(70)}
\end{align*}
\]
“I clean myself and cleanse my mouth and sharp teeth, feces protect me, and urine respects me like the scary (horrible) heaven crossers, the dead said twice” (71)

In the events of spell 342, there appeared what shows that the deceased has teeth of flint stone and canines from the viper mountain “dw.ft” as it refers to the following (72):

hr.k n m3t šn n pt wnwt.s šn n hk3 grg.wt.f šn n r3.i (p)n hk3 imy.f ibhw.i m ds nhdw.kt.i m dw.ft (73)

“Your face is towards truth (justice); heaven is surrounded by its stars and magic surrounds the kingdoms (lands); my mouth surrounds magic that is in it, my teeth are made of Flint and my canines of dw.ft(74).”

In the events of spell 666 of coffin texts, there is a description of the deceased who obtained teeth, closed under him, made of heaven star metal, in reference to extreme strength (75):

şhmw h3w h3tw in n N pn hkhw f rd(w) m ht.f ndd n N pn hr.f m s33 ibhw nw N pn htm.sn hr.f m bi3 sbty (76)

O strong people, those who are behind those specialized in the body; this deceased N has brought magic (dormant) in the body; it is being placed in part of the body of the deceased N which is under him made of electrum; the teeth of this deceased N is (complete) closed under him from the star metal (77).

As it appeared in the events of spell 991 of the coffin texts, there is reference to his teeth in the hereafter being made of metal. By destroying them, he obtains this strength and sovereignty that carries him by embodying the image of Sobek, where the following appeared in it (78):

hpr m sbk ink ḫj pw pr m shw d (bn) ink sd ibhw n bi3 ink nb ks wsr ḥsp msh (79)
“Appearance like Sobek, it is I the seed, that exits from the encircling wrappings; it is I the destroyer (breaker) of teeth made of metal; I, the master of strength and the strong being embodied in the image of the crocodile”. (80)

The same concept is repeated in spell 1011, where the deceased mentioned that he is cleansed, teethe and strong mouthed, and that he hates isft “evils”, (81) where the spell refers to the following (82):

I iwn.wy ipw n R° prr.i ʾk.i imy. tn(y) šnw ʾh° ʾḥnskt.i ṣḥḥdt n-tt ink is w°šb rš rwd ʾnhḥwt bwt.i pw lsft (83)

“O two columns of Re, I am ascending, and entering between you; my hair is standing, my braids are hanging because my mouth is cleansed; I am strongly teethe (canines) and what I hate is “isft” (84).

3. Teeth in the Book of the Dead

The previous concepts were widely repeated where the deceased becomes proud of his sharp teeth being made of flint and canines from viper mountain “dw. ft”. He also possesses the teeth of goddess “srkt” and the canines of the holy goddess Isis. He also possesses sharp teeth and canines as the canines of snake mHn. The deceased attributed himself to the city of Fayoum as he possesses white teeth.

The study starts in chapter 31 of the Book of the Dead, where his passages refer to the following (85):

Bdty rn n ky hr .k n mšr t šnt n pt m ōnw .š šn n ḥkš (m) grg.f šn n rš .i ḥkšw imy .f ḫhw .i m ds ʾnhḥwt .i m dw ft (86)

“Bdty is the other name; your face is mšr; heaven was surrounded by its stars; magic has surrounded the lands (kingdoms). My mouth has been surrounded by magic inside it; my teeth are made of flint and my canines are made of the viper mountain “dw. ft” (87).

And in Ch. 42 of the Book of the Dead, the deceased compared his teeth to the teeth of srkt and his canines to the canines of holy Isis. The chapter refers to the following (88):

- 732 -
Teeth in Ancient Egyptian Religious Texts

Aziz Mahmoud Rania Abdel

“My hair is the hair of “Nw.w”; my face is the sun disc. My eyes are “Ht- hr”. My years are “wp-w3wt”; My nose is “mhnty h3sw”. (90) My lips are “inpw”; my teeth are “srqt”; my canines are holy Isis. (91) “srqt” was one of the gods of protection (92). She participates with Isis in being one of the goddesses that protect the four members. Thus, the deceased’s comparison of his teeth to the teeth of “srqt” and canines of Holy Isis announces his desire to be embodied in the images of the protective goddesses, thus owning sharp teeth that enable him to attack the enemies.

In the passages of Ch. 172 of the Book of the Dead, the deceased looked like the snake “mhn” (93) in the sharpness of his teeth. To get this meaning, the chapter refers to the following: (94)

Iw s pry.ky Hr rdt n.k m3t’ nhm .sn(y) m3t’ n R☎ shpr .sn(y) ibw n trw ibhw .k tpy nw mhn n Hb☎ n Hrwy im iw n .k s3iw dm dd.k r dry.wt n ᵇ iw ᵇ ᵇ k h3b3sw (95)

“your lips give you the truth – repeat the truth to Ra and calm the hearts of the goddesses; your teeth are those of mhn (the snake mhn) with which the two Horus play with, a wise (careful) sharp tongue when it talks to the kite of the swamp, and your jaw is heaven studded (decorated) (with stars) (96).

Moreover, the passages of chapter 189 of the Book of the Dead are the same as passages of chapter 52 of the same book in that the deceased will receive his teeth with a mixture of perfume as a type of offerings that he obtains in the hereafter. The passages refer to the following (97):

Iw grt r t 4 m hrt–hrw nt r☎ nb s3r t m iwnw tni pw r ntr nbdd in iw
“four loaves of bread in the morning of every day and cakes from Heliopolis, because I am more outstanding than any other god. At that time, the one who doesn’t know how to count (calculate) said: who will get you the food? And upon this pure shore in the morning, I received (took) my teeth with the perfume (ointment). And thus, I will not eat it and I will not touch it with my hand or step on it with my sandals. (99)

Before ending up, the passages of the chapters of the Book of the Dead, we should not ignore chapter 125 of the Book of the Dead that referred the previous meanings with a new addition, as the deceased owning the white teeth is attributed to the land of the lake (Fayoum) in Egypt. To give this meaning, it refers to the following (100):

II qrty pr m imnt n kni I hd ibhw pr m t3- s n thi

“O dweller of caves exiting (attributed) to the west, I was not angry. O Owner of the white teeth coming from the lake (Fayoum), I have not breached the law (101).
Conclusion

Some words expressed teeth like the word \(\text{ibhw}\), the word \(\text{nhdl-t}\) and the determinative \(\text{t}\) that represents the elephant tusk.

Elephant and hippopotamus tusks and pieces of ivory were used since the era of Naqqada I in preserving make up and drugs. They could be extracted from the environment surrounding the Ancient Egyptian. Scientists suggested that magicians and dancers used these substances in their rites.

The symbolism of teeth varied in religious texts like pyramid texts, where teeth were presented with onion offering, so that the deceased through them can retrieve the life cycle and renew it, with the smell of onion and presentation of teeth.

The deceased was described as having sharp teeth like Soped. This role is related to his role as a protective god. He is an Asian god protecting the Eastern region and border areas, like turquoise mines in Sinai. Thus, the deceased writes the same characteristics. In addition, the deceased was proud of that he has strong teeth that enable him to break stone. He was granted this strength by smelling the perfume of goddess \(\text{ihnt-wtt}\) who helped him (with her scent) to possess the special power to break stone and move from one place to another in the hereafter.

The deceased was embodied more than one time in the Osirian image to be granted the strong solid teeth of Horus. His teeth represented the “ba” souls. He said the strength of his teeth and canines was because they come from the hereafter, from the viper “\(\text{dw.ft}\)”. In addition, the deceased practices special rites when he receives his teeth, where he revolves around them with an arrow. Some scientists like “Mercer” think it is a game, the game of twining like the snake "\(\text{mhn}\)”. Teeth had important symbolism and significance in coffin texts, where the deceased was granted strong teeth of flint coming from the viper mountain \(\text{dw.ft}\). He was also granted sharp teeth from star metal, signifying their extreme power and holiness.

His strong teeth and sharp canines enabled him to take the image of the god “Sobek”. He described himself being free of evils, cleanser of the mouth and hater of evils “\(\text{isft}\)”. In the book of the dead, the same previous concepts were repeated on a large scale. It affirmed ownership of flintstone teeth coming from the viper mountain “\(\text{dw.ft}\)”. It gave reason for owning sharp teeth that they are like the teeth of goddess “\(\text{srkt}\)”, and sharp canines like canines of holy Isis.

In addition, the idea was affirmed in coffin texts as to his possession of teeth of snake god “\(\text{mhn}\)”. He received teeth in a festive way, with the ointment or perfume. He gave reason for his white teeth and their glitter to his being a member of Fayoum city. Hence, he affirmed the affiliation of his teeth to the protective gods and gods that have sharp teeth, being embodied as the snake or viper, so that his canines are scary, sharp and deterrent to enemies.

30 Onion:

Egyptian saw a good omen in it in some feasts, in addition to being used to revive the dead. There were three kinds presented in offerings: leek, garlic and onion. They were widely consumed. Offering onion balls was very little in the divine rite, but it was usual in dead rites since the era of pyramids where there was a decorated ribbon of onions around the neck in the feast of soker only green onions were eaten from it on other famous occasions. It is also mentioned in medical papyri. It could also be used in magic.
